

Find everything in this scavenger hunt to get ready to make **Winter Nature Wreaths!**

Materials you need are in **purple**, and additional optional materials are in **blue!**

Acorns	String or Ribbon	Paper Plate
Twigs	Elmer's glue	Colored Construction Paper
Pinecones	Pine Needles	Different Types of Leaves
Scissors	Tray and Paintbrush (for glue)	Crayons or Markers

You can press your leaves to make your wreath last longer!

- Make sure your leaves are dry (and not brown and crinkly yet)
- Place them in between two sheets of absorbent paper
 - Parchment paper or newsprint works well
 - Paper towels won't work due to the bumps
- Put everything in between the pages of a book, and place it under a few heavy books
- Leave it in a warm, dry place for a few days, then carefully pull the leaves off

Now that you have all your materials, you're ready to get started!

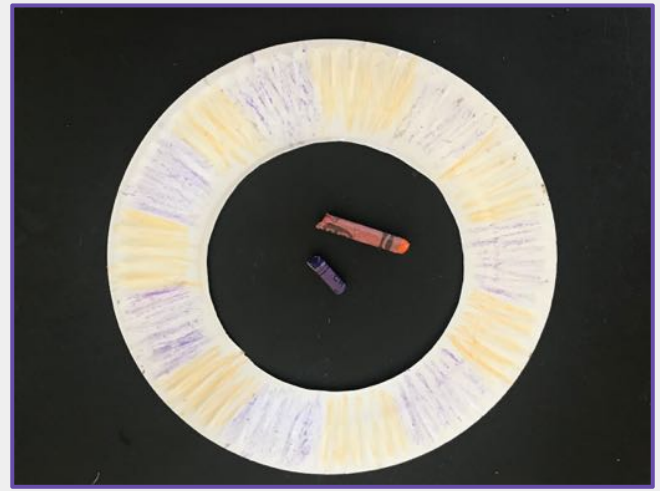

Step 1

Fold your paper plate in half, and cut out the middle

Step 2

Use crayons, markers, or colored pencils to color your paper plate

Step 3

Glue on your leaves, pine needles, acorns, pinecones, berries, and whatever else you found!

- Younger crafters may find it easier to use a brush to 'paint' the glue on from a tray

Step 4

Tie a loop with string or ribbon. Leave your nature wreath somewhere safe to dry, then hang it up!
